| Canadian / US Citizen

EDUCATION

University of Ottawa - Bachelor of Science **Computer Science** (GPA: 3.5) *Sep 2021 - Dec 2025*

SKILLS

AWS Certification	AWS Certified Cloud Practitioner
Programming Languages	Python, Java, C++, SQL, HTML5, CSS, Javascript
Web Development	React, Node.js, Next.js, MongoDB, Spring, Spring Boot
Other Technologies	Docker, Kubernetes, Github, Jenkins, Github Actions, AWS, Azure, GCP, Linux, Terraform, MCP Servers, AI Agents, Roo, Cline, Copilot

WORK EXPERIENCE

Software Engineer | Solace *May 2025 - August 2025*
(AI Agents, MCP Servers, Automation, React)

- Designed and Created a Figma Pattern Searcher MCP Server to support the UX Team with finding details regarding patterns
- Architected and Developed a front-end MCP Server, supporting up to 20 front-end developer by providing responses to various questions regarding internal front-end tools
- Gave presentation on usage of MCP Servers to the entire Engineering Department

Software Engineer | Solace *January 2025 - April 2025*
(Github Actions)

- Configured GitHub Actions to automate RPM updates in response to security vulnerabilities, ensuring timely patching.
- Reduced manual intervention by triggering package version updates automatically

Software Developer in Test | Solace *May 2024 - August 2024*
(Java, JUnit, Spring Boot, Linux, Github Actions, Docker)

- Implemented OAuth and Client Cert test coverage for JUnit test cases, improving security and authentication validation
- Developed Bash scripts to automate the local execution of connectors, improving efficiency by over **80%**.
- Developed automated Slack notifications for automated test runs, enhancing team communication

Software Engineer | PickPack *September 2023 - December 2023*
(Python, Selenium, Github Actions)

- Created and documented 40+ comprehensive test cases using Selenium, covering diverse scenarios across 10+ websites to ensure robust functionality.
- Leveraged GitHub Actions for continuous testing and delivery by automating scheduled runs using cron jobs.

PROJECTS

Personal Website with CI/CD Pipeline *May 2024*
(React, TailwindCSS, Rest-API, Next.js, Github Actions)

- Built a responsive personal website with React, TailwindCSS, and automated deployment via GitHub Actions.
